

**HOW TO HANG WORK
AT GALLERY STANDARD
CENTRE**

GALLERY STANDARD CENTRE

The rule of thumb most art galleries follow for hanging artwork is between 57 - 60 inches on center. (For these step by step instructions we will be using 58" centre.) This means that the center of each piece or grouping is 58 inches from the floor. Not only is this where art can be most easily seen and most thoroughly enjoyed, but using a standard height will also give the viewer the ability to go seamlessly from one piece to the next.

REQUIRED TOOLS AND HARDWARE

TAPE MEASURE

HAMMER

LEVEL

PENCIL

D-RING

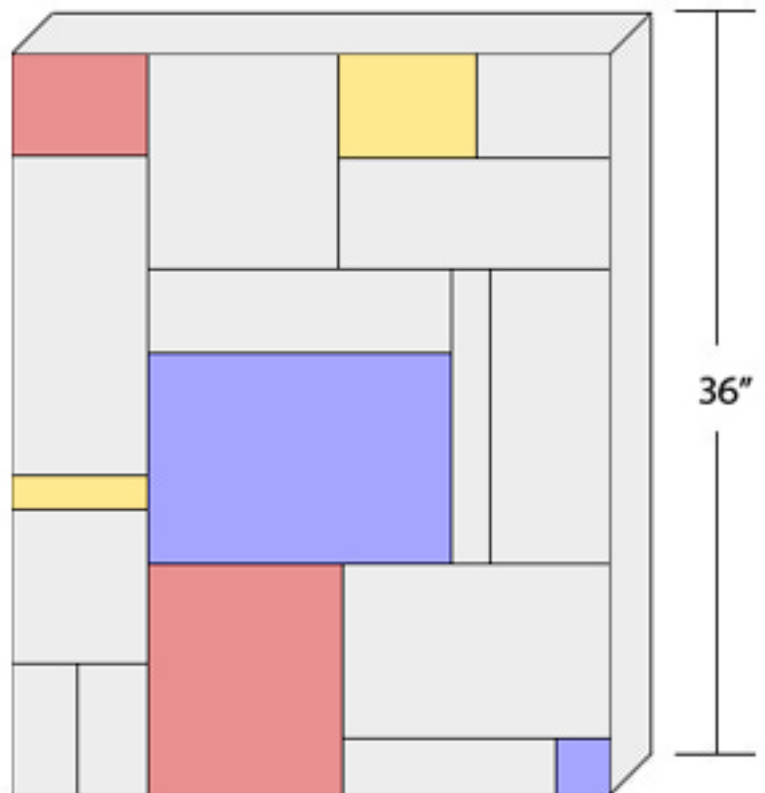

**PICTURE
HANGING
HOOK**

STEP ONE:

Measure the height of
your work.

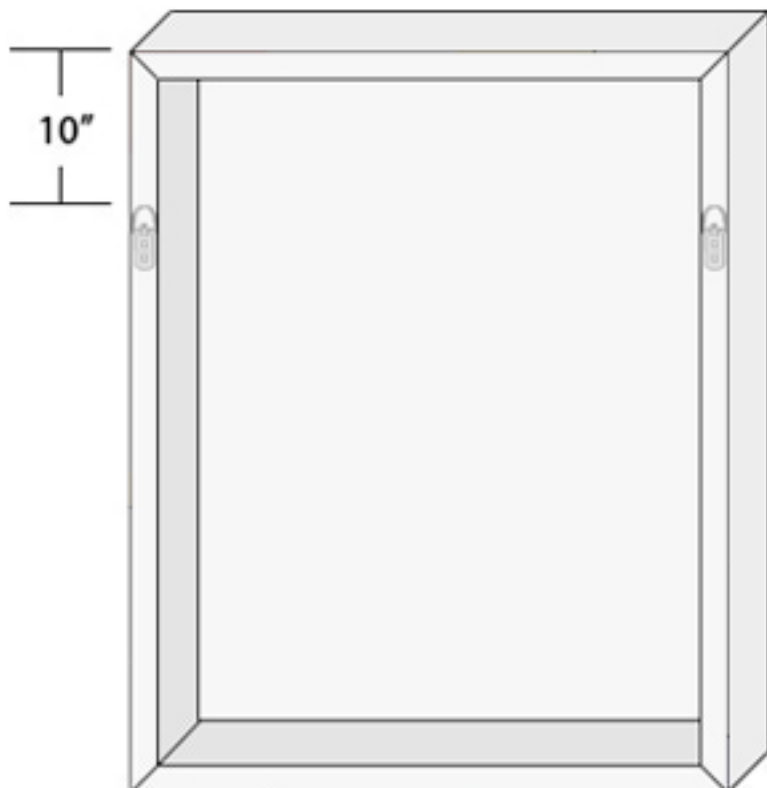

= 36"

STEP TWO:

Turn your work around
and measure from the top
of the D-ring to the top
of the work.

= 10"

STEP THREE:

Take the height from Step One (36") and divide it by 2 and then minus the number from Step Two.

$$\text{STEP ONE} / 2 - 10 = 8''$$

$$36 / 2 - 10 = 8''$$

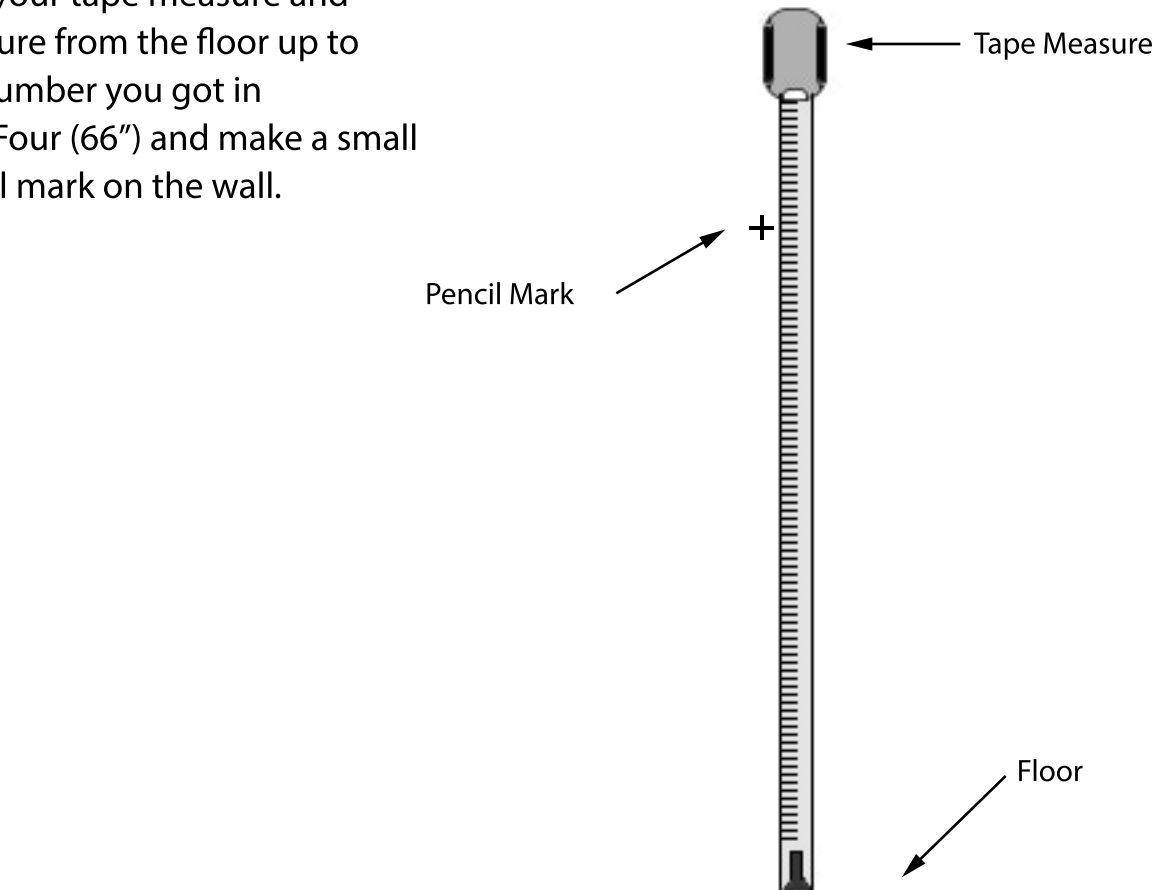

STEP FOUR:

Take the result from Step Three and add the gallery standard centre to it. (58" centre for this example)

$$= 8'' + 58'' = 66''$$

STEP FIVE:

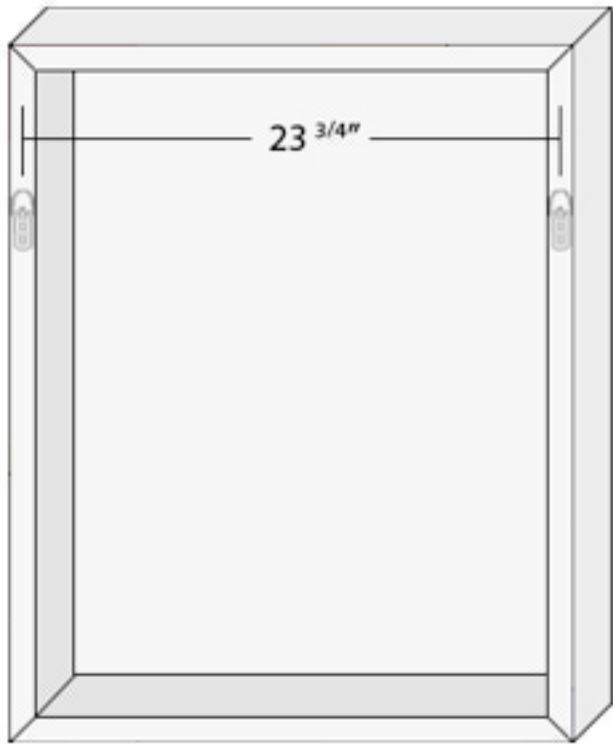

Take your tape measure and measure from the floor up to the number you got in Step Four (66") and make a small pencil mark on the wall.

STEP SIX:

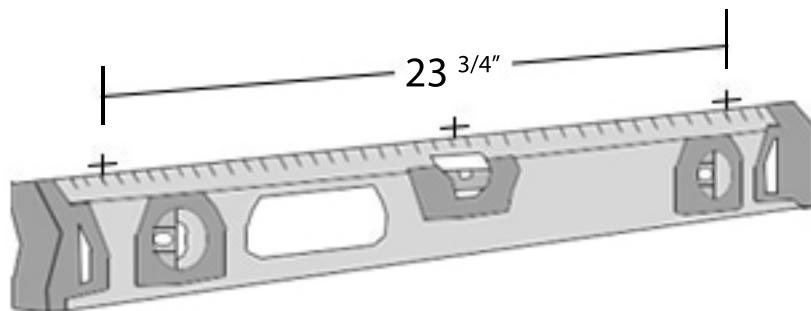

Measure the distance between the two D-rings, from the centre of each (be exact).

= 23 ³/₄"

STEP SEVEN:

Take your level and place the centre of it on the mark you made on the wall. Now make 2 marks on the wall that are 23 ³/₄" apart.

STEP EIGHT:

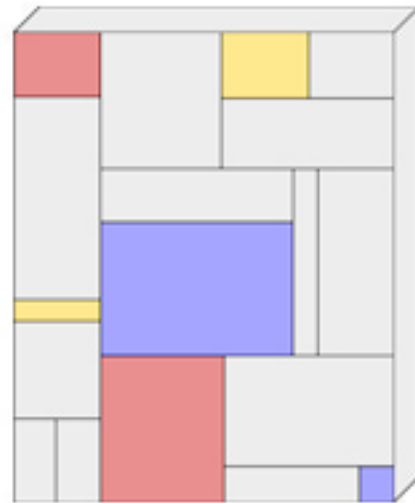

Take a picture hanging hook and place the bottom of the hook on one of the marks you made on the wall. Hammer the hook into the wall and repeat for second hook.

STEP NINE:

Take the work and place the D-rings onto the picture hanging hooks. Check to make sure it's level.

Complete!

58" From floor
to centre of work

Floor
